Picture Taking Tips and Tricks

Step 1	Take multiple photos – even if you’re not a photographer, if you take multiple rapid fire photos, there’s a chance one of them will turn out.	
Step 2	Take photos with people and other animals. Let the adopter see the environment the pet is comfortable in.	
Step 3	Take photos outdoors if possible. If you have an indoor only cat, take a photo inside the house with as much natural light as possible.	
Step 4	Make sure the pet is looking at the camera lens. Eyes are the window to the soul, after all.	
Step 5	Take pictures that showcase the pet’s personality. Do they enjoy bath time or swimming? What about car rides or snuggles?
