

# PLANNING ADVISORY BOARD ZONING COMMISSION

**DECEMBER 11, 2012**

*Source*

Great Falls Transportation Planning Process

*Requested Action*

**Approve Amendment #1 to the FFY 2011-2015 Transportation Improvement Program.**

*Project Planner*

Andrew Finch

## AMENDMENT #1– FFY 2013-2015 TRANSPORTATION IMPROVEMENT PROGRAM

### SUMMARY

#### Overview

The Transportation Improvement Program (TIP) is a staged, five year, intermodal planning document that includes transportation projects proposed for implementation in the Great Falls Metropolitan Area. It includes projects financed with U. S. Department of Transportation, Montana Department of Transportation, and City and County funds. The TIP aids in the effective development of a variety of projects and efficient management of varied money sources, and is the main implementation tool of the Great Falls Area Transportation Plan.

Occasionally, an amendment to the Transportation Improvement Program (TIP) becomes necessary, usually due to changes in available funding, changes in project costs, or the addition of projects. Amendment #1 to the Federal Fiscal Years (FFY) 2011-2015 TIP considers a number of minor changes, including the following:

- 1) A grant for Veterans' transportation services
- 2) Design for pavement preservation projects
- 3) Reflective signal-head borders safety project
- 4) District-wide safety curve/wrong way

signage projects

- 5) Design for new ADA/curb ramps 25th/25th Sts.
- 6) I-15 fence replacement
- 7) 3rd St. NW-NW Bypass to 10th St. NE signal timing/controller upgrades
- 8) 10th Ave. S. signal controller upgrades

It also generally updates project costs, by phase, and updates past and expected funding amounts from the various funding sources. Finally, it also revises project schedules, by year, as project development timelines shift.

Other local TIP approval bodies include the Great Falls Technical Advisory Committee (TAC) and the Policy Coordinating Committee (PCC) - TAC and PCC will consider Amendment #1 on December 13th and 14th, respectively. The full TIP, with amended items highlighted, is appended to this Report as "Attachment A."

#### Summary of Changes

The Amendment brings the TIP up to date. As projects progress, budgets change and shift, development timelines change, and new projects are proposed. As well, available funding increases or decreases and funding projections become firm numbers.

“Attachment A” is the proposed Amended TIP, with major changes high-lighted in gray on Tables 4, 6 and 7. In addition, Table 1 includes updated costs and MDT’s added projects summarized above. No priorities have been modified. Also, Table 2 has been updated to reflect the latest funding amounts and projections, and Table 3 has been slightly modified to reflect shifts in project schedules.

**Additional Funding for Bootlegger Trail Reconstruction Project**

The Transportation Advisory Committee has recommended additional Air Quality Improvement Funds (through the Montana Air and Congestion Initiative (MACI) Program) be used on a project to Reconstruct Bootlegger Trail, in the amount of \$460,000. If approved by PCC and the Planning Board, this amount would be included in Amendment #1.

RECOMMENDATION

**The Planning Advisory Board approve Amendment #1 to the FFY 2011-2015 Transportation Improvement Program, with the additional inclusion of \$460,000 in MACI Program funds to the Bootlegger Trail reconstruction project, if also approved by PCC.**

Amendment #1

## **PART I. GENERAL REQUIREMENTS/STATEMENTS**

### **A. INTRODUCTION.**

In response to provisions of the "Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users" The U S Department of Transportation issued regulations effective March 16, 2007, revising Title 23, U.S.C. and the Federal Transit Act, as amended, governing the development of transportation plans and programs for urbanized areas. These regulations govern the development of this Transportation Improvement Program.

The regulations prescribe the preparation of a transportation plan and, in order to facilitate implementation of the transportation plan, also prescribe the development of a Transportation Improvement Program (TIP).

As specified in the regulations, the Transportation Improvement Program:

- Is a staged, multi-year, intermodal program of transportation projects;
- Is consistent with the transportation plan;
- Is developed and updated by the transportation policy body of the area in cooperation with state and local officials and other affected transportation and implementing agencies, including affected public transportation providers such as the Great Falls Transit District;
- Is updated at least every four years;
- Updating frequency and cycle is compatible with the State Transportation Improvement Program (STIP) development and approval process;
- Covers a period of not less than four years, although additional years are considered informational; (The Great Falls TIP is a five year program);
- Includes a priority list of projects to be implemented during the time frame of the program;
- Is fiscally constrained by year and includes a financial plan. All revenue and cost estimates for the TIP use an inflation rate to reflect "year of expenditure dollars," based on reasonable financial principles and information, developed cooperatively by the MPO, State(s), and public transportation operator(s);
- May be modified at any time; and,
- In non-attainment and maintenance areas, such as the Great Falls Metropolitan Area, must be subjected to an air quality conformity determination by the MPO, FHWA and FTA in accordance with Federal Clean Air Act requirements, EPA conformity regulations and State of Montana air quality rules, as pertain to conformity.

Additionally, the Transportation Improvement Program includes:

- All capital and non-capital surface transportation projects or identified phases of a project within the Great Falls Metropolitan Planning Area proposed for funding under Title 23, U.S.C. and the Federal Transit Act, excluding (at local discretion): safety projects, emergency relief projects and planning and research activities;
- Only projects that are consistent with the transportation plan;
- All regionally significant transportation projects for which an FHWA or FTA approval is required whether or not the projects are to be funded with Title 23, U.S.C. or Federal Transit Act funds;
- For informational purposes and air quality analysis in non-attainment and maintenance areas, all regionally significant transportation projects proposed to be funded with Federal funds not noted above or to be funded with non-Federal funds.

With respect to each type of project generally described above, the TIP also includes:

- Sufficient descriptive material to identify the project or phase;
- Estimated total cost, reflected in year of expenditure dollars;
- The amount of Federal funds proposed to be obligated during each program year;
- The proposed source of Federal and non-Federal funds;
- Identification of the agencies responsible for carrying out the project;
- In non-attainment and maintenance areas, identification of those projects which are identified as Transportation Control Measures (TCMs) in the applicable State Implementation Plan, and in sufficient detail for air quality analysis; and,
- In areas with Americans with Disabilities Act required Paratransit Plans, identification of those projects which will implement the plans.

As a management tool for monitoring progress in implementing the transportation plan, the TIP shall:

- Identify the criteria and process for prioritizing implementation of transportation plan elements for inclusion in the TIP and any changes in priorities from previous TIPs;
- List major projects from the previous TIP that were implemented and identify any significant delays in the planned implementation of major projects;
- In non-attainment and maintenance areas, describe the progress in implementing any required Transportation Control Measures (TCMs) and include a list of all projects found to conform in a previous TIP and are now part of the base case for

the purpose of air quality conformity analyses. Projects shall be listed until constructed.

B. RELATIONSHIP BETWEEN TRANSPORTATION IMPROVEMENT PROGRAM AND STATE IMPLEMENTATION PLAN.

A Transportation Improvement Program (TIP) is a multi-year staging program. It includes projects and improvements recommended from the transportation plan. It identifies priorities, anticipated time frames and annual activities for implementation.

A State Implementation Plan (SIP), as it relates to transportation-related air pollutants, identifies air pollution control strategies for areas which are in non-attainment of National Ambient Air Quality Standards.

Transportation-related air pollutants are best controlled or reduced through implementation of transportation-related control strategies. These control strategies are identified and developed through the SIP preparation process. In general, the process defines solutions to air quality problems in non-attainment areas. To ensure that the identified solutions or strategies are implemented in accordance with the timeframe in the SIP for attainment of standards, these solutions or strategies are also programmed in the TIP.

When the Great Falls area was designated as non-attainment of secondary standards for total suspended particulates (TSP) in the late 1970s, a cooperative effort by the State Air Quality Bureau, City-County Health Department, City of Great Falls, Montana Department of Transportation and City-County Planning Board resulted in the analysis, review and selection of TSP control strategies. The problem involved inadequate street sanding materials and street sweeping operations during winter months. As such, the level of effort to attain standards primarily involved improving the sanding materials and sweeping operations.

These solutions solely involved seasonal maintenance and operation budgets and did not require any major capital expenditure. As such, the solutions, as identified in the Great Falls portion of the SIP, were not included in the TIP, as would have been the case if major cost intensive improvements were needed.

With the past designation of the Great Falls area as non-attainment of Carbon Monoxide standards, a revision to the SIP was conducted. However, the strategy proposed in the SIP was not included in the TIP because of the nature of the strategy, which was to rely upon the newer model of automobiles to remedy the problem. This was on the premise that the newer autos being designed would emit fewer pollutants. If local and State resources had been required, the strategies would have been included in the TIP under a time frame, which corresponded with that of the SIP. This would assure that the two were consistent and that standards would be attained in accordance with an established timeframe.

Because the Great Falls area did not attain compliance with carbon monoxide (CO) standards through implementation of the strategy or within the established timeframe, a different study effort was initiated during FFY 1989. However, in early 1992, the Great Falls non-attainment area was reclassified as a "not classified" non-attainment area. As such, an SIP update was not required, but an emissions inventory was developed to

establish a data base for TIP conformity determinations and for requesting a redesignation as an attainment area.

A 1996 base year emissions inventory was submitted to EPA in February 2000, along with a ten year maintenance plan and a request to redesignate Great Falls as an attainment area. In May 2002, EPA redesignated Great Falls as a "limited maintenance plan" attainment area. With the redesignation, Great Falls must still comply with the ten year plan (through 2012) and has recently submitted a revised maintenance plan that provides for maintenance of the CO standards for an additional ten years. This second maintenance plan is currently in the hands of EPA, and this TIP is considered compliant for Air Quality requirements. The State Air Quality Bureau and the City-County Health Department continue to monitor and analyze CO levels in Great Falls to help demonstrate ongoing compliance with the CO standards.

In that no required Transportation Control Measures (TCMs) are included in the SIP, there are no specific TCMs recommended for implementation in this TIP. However, as a prerequisite for receiving Federal-aid transportation funds through the TIP, a determination must be made that the proposed transportation projects do not cause or contribute to violations of the carbon monoxide ambient air quality standards. This determination is made through a regional emissions analysis, which assesses the TIP's impact on vehicle-use patterns and associated carbon monoxide levels.

An analysis, which meets the EPA conformity determination regulations specified in 40 CFR Part 51, was performed in conjunction with the development of the 2009 Great Falls Area Transportation Plan. The analysis appears in Chapter 16 of the Plan document and is titled, "CONFORMITY DETERMINATION". The Plan was found to conform on April 23, 2009.

Because transportation projects in the TIP are contained in the Plan's regional emissions analysis, a separate analysis is not necessary. However, for the purposes of tracking project status relative to the emissions analysis, projects are categorized into one of two classes, the Baseline Scenario and the Action Scenario. Loosely defined, projects in the Baseline Scenario have been included in a prior analysis and are in the process of being implemented or have recently been implemented. Projects in the Action Scenario are proposed projects that are included in the most recent analysis.

The following is a list of those projects that have been assigned to one of these two classes.

<u>Baseline Scenario</u>	<u>Action Scenario</u>
6 <sup>th</sup> St NW (Cent. Ave. W. to NW Bypass)	There were no new nonexempt projects within the nonattainment area.
14 <sup>th</sup> /15 <sup>th</sup> St. Couplet (10 <sup>th</sup> Ave S - River Dr.)	
10 <sup>th</sup> Ave S & 39 <sup>th</sup> St Intersection (Signal)	
3 <sup>rd</sup> St NW at 14 <sup>th</sup> Ave & Smelter Ave at 6 <sup>th</sup> St	

Intersections (Signals)

Gore Hill Interchange

Giant Springs Road  
(Relocation)

Northeast Bypass  
(2<sup>nd</sup> Ave N to 38<sup>th</sup> St)

13<sup>th</sup> Street South  
(10<sup>th</sup> to 21<sup>st</sup> Ave So.)

C. MERGING SHORT RANGE AND MAJOR STREET NETWORK IMPROVEMENTS INTO THE TIP.

Project prioritization exercises are periodically conducted by the local Technical Advisory and Policy Committees to rank short range and major street network improvements. Those improvements with the highest ranking are incorporated into the TIP until the projected urban funding for the five years of the TIP are exhausted.

D. ENERGY CONSERVATION CONSIDERATIONS IN THE TIP.

In the past, energy impact analyses have been conducted as a part of the urban transportation planning process, particularly in systems planning activities and in environmental impact statements during specific project planning activities. Additionally, attention was given to energy conservation and contingency planning.

The Great Falls area has an operating transit system. Additionally, ridesharing was investigated. Interface of transit facilities and roadway proposals will continue to be considered.

E. CERTIFICATION STATEMENTS.

In accordance with regulations, effective March 16, 2007, governing transportation planning under FHWA and FTA grant programs, the Metropolitan Planning Organization (MPO) hereby certifies that the requirements of 23 CFR 450.334 and 49 CFR 613 Subpart A are met.

Additionally, the Metropolitan Planning Organization certifies that the local process established for the involvement of private enterprise has been followed.

The MPO assists the Great Falls Transit District Board in providing notice to local private transportation providers. The notice advises that the local TIP is being developed and that it includes a program of transit projects. The notice further advises of the times, dates and meetings during which the program will be discussed and considered. Providers are encouraged to attend and participate.

In that the Transit District Board operates paratransit services in-house, it no longer solicits bids for this type of service and operation from the private sector.

F. ANNUAL LISTING OF OBLIGATED PROJECTS.

SAFETEA-LU requires the development of an annual listing of projects for which Federal funds have been obligated in the preceding year. By reference, this annual listing is available in the offices of the Great Falls Planning Advisory Board (MPO), as well as on the Great Falls Planning & Community Development Department's website.

## PART II. PROJECT PRIORITIES

Project priorities in the Great Falls Metropolitan Area are established by several different agencies, depending on the source of funds.

Priorities for projects to be funded with Surface Transportation Program (Urban System) Funds and Montana Air Congestion Initiative (MACI) - Guaranteed Program Funds are established by the Technical Advisory Committee and the Policy Coordinating Committee. Community Transportation Enhancement Program projects are selected by the City of Great Falls and Cascade County.

The selection of projects to be funded with Federal National Highway System (NHS) Program Funds in the Great Falls Metropolitan Area is made by the Montana Department of Transportation in cooperation with the local transportation planning participants.

Priorities for Federal Surface Transportation Program (Enhancement) Fund projects are set by the City of Great Falls and by Cascade County for projects to be funded with allocations made available to each jurisdiction.

The Great Falls Transit District Board makes decisions and priorities on the use of Federal Transit Administration Section 5307 funds.

The following is a list of major Federal/State funded roadway projects which were implemented in the Great Falls Metropolitan Area during the past five years and were included in previous year TIPs.

<u>Year Completed</u>	<u>Project</u>	<u>Description</u>	<u>Funding Agency</u>	<u>Total Cost</u>
2006	6 <sup>th</sup> Street Northwest	Reconstruct from 16 <sup>th</sup> Ave NW to Smelter	St/Fed	\$1,375,000
2006	3 <sup>rd</sup> Street Northwest	Overlay from Central Ave W to 10 <sup>th</sup> St NE	St/Fed	\$1,475,000
2006	57 <sup>th</sup> Street South	Overlay from 2 <sup>nd</sup> Ave N to 10 <sup>th</sup> Ave S	St/Fed	\$443,000
2006	10 <sup>th</sup> Street N	Overlay from Smelter Ave to US Hwy 87	St/Fed	\$540,680
2006	Sidewalks-GTF	Sidewalks on 3 <sup>rd</sup> St NW/Smelter/NW Byp	St/Fed	\$910,000
2006	Great Falls N/S I-15	Concrete rehabilitation on I-15 in urban area	St/Fed	\$12,464,000
2006	Great Falls Vaughn 1-15	Seal and cover, 7.7 miles	St/Fed	\$642,500
2007	Fox Farm Rd Sidewalks	Alder to Park Garden Rd – new sidewalk	St/Fed	\$501,300
2007	Street Cleaning Prog Ph I	Sweepers & Flush Truck	Local/Fed	\$429,900
2008	10 <sup>th</sup> Ave S	Acceleration lane from 57 <sup>th</sup> Street	St/Fed	\$369,500
2008	I-315 Pavement Pres	Overlay, S&C	St/Fed	\$1,116,400
2007	2 <sup>nd</sup> Ave S	Reconstruct from 7 <sup>th</sup> to 15 <sup>th</sup>	St/Fed	\$882,800
2007	2 <sup>nd</sup> Ave N	Widen/resurface 15 <sup>th</sup> St to Park Ave	St/Fed	\$6,367,500
2008	River Drive S/BNSF RR	Bridge Replacement	St/Fed/Local	\$7,228,900
2008	NW Bypass	3 <sup>rd</sup> St NW to 9 <sup>th</sup> St NW Pavement preserv.	St/Fed	\$725,000
2008	Vaughn Rd.	Overlay, Central Ave S to NW Bypass	St/Fed	\$358,300
2009	City-wide Sidewalks	Sidewalks, various locations	St/Fed/Local	\$4,310,100
2009	38 <sup>th</sup> St/8 <sup>th</sup> Ave N/6 <sup>th</sup> St SW	Trail/Bike/ped improvements	St/Fed/Local	\$634,700

2009	Smelter Ave/10 <sup>th</sup> St NE	Intersection reconfiguration	St/Fed/Local	\$2,732,800
2009	US 87 widening	Turn lanes at malt plant entrance	Fed	\$1,309,500
2009	Park Drive	6 <sup>th</sup> St to 1 <sup>st</sup> Ave N Pavement preservation	St/Fed	\$355,400
2009	6 <sup>th</sup> St N	Pavement preservation Central Ave-8 <sup>th</sup> St	St/Fed	\$288,200
2009	1 <sup>st</sup> Ave N	Pavement preservation W of River Dr	St/Fed	\$298,500
2009	1 <sup>st</sup> Ave N	Pavement preservation Park Dr-9 <sup>th</sup> St	St/Fed	\$390,300
2009	River Dr	Pavement preservation 1 <sup>st</sup> Ave N to 9 <sup>th</sup> St	St/Fed	\$549,900
2009	Air Quality equipment	Flush Truck Purchase	Fed/Local	\$218,000
2009	10 <sup>th</sup> Ave S	Pavement preservation 38 <sup>th</sup> St to 57 <sup>th</sup> St	St/Fed	\$1,826,700
2010	10 <sup>th</sup> Ave S & 38 <sup>th</sup> /32 <sup>nd</sup> Sts	Intersection turn lanes	St/Fed	\$519,600
2010	Bay Drive Bike/Ped Path	Bike Ped Path	Fed/Local	\$936,900
2010	10 <sup>th</sup> Ave S	Reconstruct & widen 20 <sup>th</sup> to 26 <sup>th</sup> St.	St/Fed	\$8,063,000
2010	Air Quality equipment	Sweepers/flush truck	Fed/Local	\$460,200
2010	I-15	Bridge Deck Repair 5 <sup>th</sup> Ave SW & Sun River	St/Fed	\$1,225,700
2011*	Warden/Central Ave W	Bridge Deck Rehab/Repair	St/Fed	\$2,735,100
2011*	River Drive	Pavement Preservation 15 <sup>th</sup> St-25 <sup>th</sup> St	St/Fed	\$692,100
2011*	Central Ave W	Pavement Preservation	St/Fed	\$905,000
2011*	1 <sup>st</sup> Ave N	Pavement preservation 9 <sup>th</sup> to 25 <sup>th</sup> St	St/Fed	\$1,448,100
2011*	1 <sup>st</sup> Ave N	Sidewalk/Ramps 25 <sup>th</sup> -38 <sup>th</sup> Sts	St/Fed	\$176,200
2011*	2 <sup>nd</sup> Ave N	Sidewalks/Ramps 15 <sup>th</sup> -37 <sup>th</sup> Sts	St/Fed	\$306,800

\* under construction June 2011

There has been no major locally funded roadway reconstruction project (none regionally significant) implemented in the Great Falls Metropolitan Area for many years (since 1991).

The following project priorities (Table 1) are proposed to be implemented during the five years of this TIP.

**TABLE 1

### **PART III. FINANCIAL PLAN**

Table 2 summarizes current revenue sources and estimates anticipated to be available for transportation system development in the Great Falls Metropolitan Area during the next five years. The following narrative explains each of the revenue sources and discusses some of the difficulties associated with estimating revenue levels.

The Federal-aid highway funding categories described herein are those funding programs established under SAFETEA-LU. There are two major funding categories, including the Federal National Highway System (NHS) and the Federal Surface Transportation Program (STP).

Regarding NHS funds, these funds are distributed throughout the State, based on statewide highway needs. In general, highway projects within each financial district compete for available funding based on a priority program for all NHS projects within the State. Projects on the NHS system are selected and prioritized by MDT. However, NHS system needs in the urbanized area may be identified and recommended to the MDT through the local transportation planning process and in any case must be included in an approved TIP before implementation can occur.

Regarding STP funds, the Montana State Legislature chose to sub-allocate these funds to state designated funding systems. As such, in 1993, State Primary, Urban and Secondary highway systems were designated.

For the Primary system, funds are allocated to each of five financial districts in the State based on highway mileage sufficiency ratios. The level of primary system funds available to the Great Falls Metropolitan Area varies and is dictated on whether the Montana Department of Transportation (MDT) chooses to fund roadway projects on the designated Primary highway system in the Great Falls Metropolitan Area.

For the Urban system, funds are allocated to cities in the State with populations of over 5,000. The distribution is based on the ratio of urban population in each city to the total urban population in all cities in the State with populations of over 5,000. As such, the level of urban funds for the Great Falls Metropolitan Area should remain somewhat constant throughout the five-year period of the TIP.

For the Secondary system, funds are currently allocated to each of the five financial districts based on ratios of land area, rural population, rural road mileage and value of rural lands in each district to the total of these items in the State. Funds apportioned to each district are further apportioned to each county in the district on the same basis. These funds are not available for use within the Great Falls Metropolitan Area but are available for use in the remainder of the Transportation Study Area. MDT maintains paved secondary roads.

Federal transportation enhancement set-aside funds are used for special purpose projects including bikeways, pedestrian facilities, landscaping, scenic beautification, historic preservations, etc.

Through the Montana Air Congestion Initiative (MACI) Program, MDT distributes funds from the Federal Congestion Mitigation and Air Quality (CMAQ) Program. Funds are available for intersection improvements, signal synchronization, bike/pedestrian facilities, transit and other activities to improve air quality through reduced congestion, or other transportation-related projects that would improve air quality.

All Federal-aid funded projects scheduled in subsequent program years involving a commitment of funds in excess of annual allocations will be reviewed by MDT prior to future TIP approval to determine if such a commitment is in accordance with the objectives of the overall statewide construction program.

For Federal Transit Administration (FTA) Section 5307 funding, Federal regulations specify that capital and operating system grants are provided annually for urbanized areas with populations over 50,000 and under 200,000. In Montana, only Great Falls, Missoula and Billings qualify for these funds. Section 5307 funds require local funding at 20 percent of the total grant for capital grants and 50 percent of the total for operating grants. On occasion, Section 5309 Discretionary funds are made available to the Great Falls Transit District Board.

Limited funds for public transit assistance are also available from the State of Montana. MCA 7-14-102 outlines a distribution methodology for these funds. Amounts vary, and are calculated based upon local expenditures for public transit. The Great Falls Transit District is eligible for an allocation based upon the ratio of its local financial support for public transportation to the total local financial support for all general public transportation systems in the state. Local financial support is determined by dividing the district's expenditure of local revenue for transit operations during the fiscal year by the mill value of the transit district. The transit district computes its expenditure of local revenue for transit operations for a fiscal year immediately following the end of the fiscal year and applies allocations received against that deficit. This amount may not be more than 50% of any year's expenditure of local revenue for public transit.

Another potential source of revenue for public transportation improvements is FTA Section 5310 funds. These funds are used to help localities purchase buses and related equipment for provision of services to the elderly and handicapped. Such funds have been used to assist agencies such as the Cascade County Senior Citizens, Retired Senior Volunteer Program, and Montana Easter Seals-Goodwill. Grants are made from year to year through the Montana Department of Transportation on the basis of demonstrated need and coordination of services. Thus, while funding is available, it is difficult to estimate the specific amount of funds, which will be available in any given fiscal year.

Gas Tax allocations are made by the Montana State Legislature every two years. It should be noted that a portion of the City's gas tax allocation is expended for routine street maintenance and material purchases by the City Street Division. The majority of the County's gas tax allocation is spent outside the Great Falls Metropolitan Transportation Study Area and the portion spent within the study area ordinarily fluctuates from year to year.

Several other sources also provide funds. Federal highway safety set-aside funds are available, though these funds are not allocated directly to an urban area but are programmed on a statewide basis according to traffic accident statistics and other indications of highway safety problems. Federal bridge replacement/rehabilitation funds and Interstate funds are also available on a project by project basis. Communities, by means of special improvement districts or local revenue or general obligation bonds, can also raise other roadway improvement funds.

In 2009, the American Recovery and Reinvestment Act of 2009 (Recovery Act) made funds available for transportation projects and the Great Falls area was able to utilize these funds to some extent. A number of roadway overlay projects, a sidewalk project, intersection improvement project, transit bus purchases and two enhancement projects were constructed with Recovery Act funds. This is a unique funding source, and will likely not be repeated.

Finally, with current uncertainties in funding projections due to expiration of the SAFETEA-LU, it is likely project priorities, scopes and funding levels will need revision at a time in the near future. When/if Federal transportation programs or funding levels shift significantly, the TIP will be reviewed for accuracy. At that time, projects will be considered for removal (if funding decreases) or addition (if funding increases), project scopes will be considered for revision, and Amendments, Administrative Modifications or a complete TIP update will be initiated, as appropriate.

**TABLE 2**  
**ESTIMATED TRANSPORTATION REVENUE**  
**GREAT FALLS METROPOLITAN AREA**  
**GREAT FALLS, MONTANA**

Funding projections for 2011-2015 are based on best available information and are subject to change given current funding uncertainties and unknown impacts of future Congressional or other federal actions. Federal program funding availability may impact the scheduling of projects. Funding will be subject to the obligation limitation set by The annual appropriations process.

1 Federal and State matched Surface Transportation Program-Urban (STPU) Funds allocated to Great Falls Metropolitan Area.

2 Federal and State or Local matched Montana Air Congestion Initiative (MACI)-Guaranteed Program Funds.

3 Federal and State matched National Highway System (NHS) Funds for expenditure in the Great Falls Metropolitan Area by the Montana Dept. of Transportation.

4 Federal and State matched Interstate Maintenance (IM) funds for expenditure in the Great Falls Metropolitan Area by the Montana Dept. of Transportation

5 Fed & State matched BH Funds (\$8,210,474); HSIP Funds (\$470,034); UPP funds (\$1,407,000); Earmark MT066 (\$499,915); Earmark-SoArterial (\$4,459,350); State Funds (\$2,397,589) STPRP/RRP (\$334,292) and Annual State (\$973,000) Local (\$527,000) Operations & Maintenance Funds (Ending Balance reflects the estimated remainder of the South Arterial earmark)

6 Federal Transportation Enhancement Set-Aside Funds allocated to City and County. Local match of 13.42% not included.

7 Federal Transit Administration Capital and Operating Assistance Funds allocated to the Great Falls Transit District. Local match not included. Sec. 5310 Funds

\*Funding projections for 2011-2015 are based on best available information and are subject to change given current funding uncertainties and unknown impacts of future congressional or other federal actions. Federal program funding availability may impact the scheduling of projects. Funding will be subject to the obligation limitation set by the annual appropriations process. \*\*Requires funds transfer to FTA

\*\*\*Not all project locations are in planning area

\*\*\*\*Construction estimate includes \$950,000 HUD earmark

\*\*\*\*\*Funds considered reasonably available but award is dependent on outcome of competitive process

## **PART V. IMPLEMENTATION ELEMENT**

This three-year element provides detailed descriptive information about all project activities and phases proposed for implementation during the first three years of the TIP, including Federal Fiscal Years 2011, 2012 and 2013.

The first year element is presented on Table 5, the second year element is presented on Table 6, and the third year element is presented on Table 7.

**TABLE 5**
