

PLANNING ADVISORY BOARD ZONING COMMISSION

MARCH 12, 2013

Case Number

N/A

Applicant

City of Great Falls

Owners

City of Great Falls

Property Location

East of U.S. Highway 87 in the northern portion of the City.

Parcel ID Number

Existing: 1029675,
1029655, and 1029670
Proposed: 1029650

Requested Action

Accordance of zoning with Growth Policy
Conformance of TIFID Plan with Growth Policy

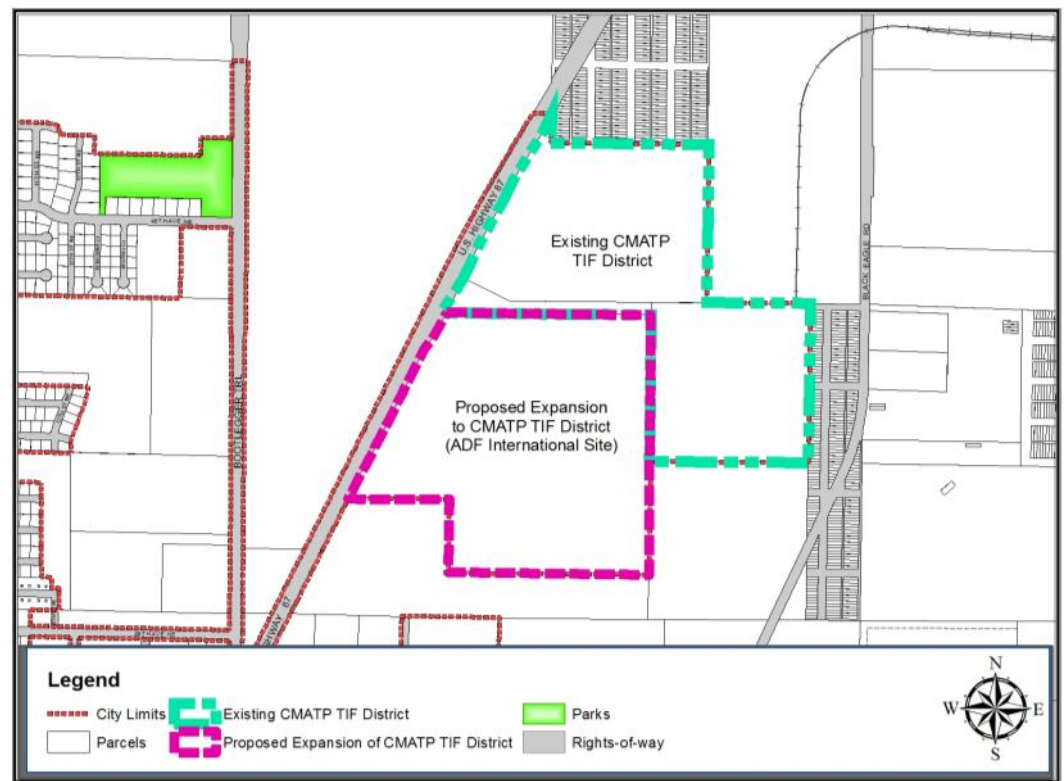

Recommendation

Adopt Planning Advisory Board Resolution recommending to the City Commission that the zoning is in Accordance and the TIFID Plan is in Conformance with the Growth Policy

Project Planner

Jana Cooper, RLA

CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK EXPANDED TAX INCREMENT FINANCING INDUSTRIAL DISTRICT - CITY OF GREAT FALLS, MT

Overview

Project Description

The proposed expanded CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK Tax Increment Financing Industrial District (TIFID) is planned to be an industrial park with an emphasis on value-added processing of products.

The subject property is generally located east of U.S. Highway 87, in the north portion of the City of Great Falls.

Background

Legal Description of property's location:
All of Lots 2, 4, and 5, Block 1 of the International Malting Company, LLC Addition and all of Lot 1A of the Correctional Plat of the First Amendment to the International Malting Company, LLC Addition, Section 30, T21N, R4E, P.M.M., Cascade County, Montana

Area of property: ±200.32 acres

Agency Comment

Planning & Community Development, Public Works and other City Departments have attended meetings regarding the expansion of the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID.

Introduction

In accordance with Section 7-15-4299, MCA, establishment of a proposed TIFID must include the local government's planning board's recommendation that the zoning within the proposed TIFID is light or heavy industrial in accordance with the local government's growth policy. Furthermore, pursuant to Section 7-15- 4213, MCA, a proposed TIFID plan must go to the local government's planning board for review and recommendation as to the TIFID plan's conformity with the growth policy. To facilitate the Planning Advisory Board's review and recommendation regarding the accordance of the zoning and conformance of the proposed CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID Comprehensive Development Plan (PLAN) with the Great Falls Growth Policy, the proposed CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID PLAN has been provided to the Planning Advisory Board and is designated Exhibit B.

Tax increment financing (TIF) is a state authorized, locally driven funding mechanism that allows cities and counties to direct property tax dollars that accrue from new development, within a specifically designated district, to community and economic development activities. TIF is one of the few mechanisms that local governments have to encourage investment and to diversify tax base. As communities lose jobs and tax base, they are forced to eliminate services, close schools and cut jobs. TIF provides an opportunity to “turn the tide” of decline. The creation of a TIF district fosters thoughtful land use planning. The enabling statutes specifically indicate that a TIF district’s plan must be found to be in conformance with a jurisdiction’s Growth Policy, and TIF district zoning in accordance with a jurisdiction’s Growth Policy. TIF does not increase property taxes. Rather, it only affects the way that new taxes, once collected, are distributed. Tax payers located within a TIF district pay the same amount as they would if the property was located outside the district. Virtually all of the resulting new property tax dollars can be directed to redevelopment and economic revitalization activities within the area in which they are generated. TIF funds are used to make infrastructure improvements that benefit the public and allow for orderly growth. Funds generated from TIF districts can be used directly for projects and to leverage state and federal grants. This is particularly important to smaller communities, which often face significant challenges in finding matching funds. Tax Increment Financing may be used to address blight and infrastructure deficiencies in support of industrial development, technology innovation, and the revitalization of central business districts.

TIFID Process

The process to establish a Tax Increment Financing Industrial District includes multiple steps which are generally described as follows:

- Identify a potential district, all of which must be located in a single jurisdiction.
- Compile a list of property owners for the district, geocodes and prepare a legal description and map.
- Meet with affected taxing jurisdictions to provide information and seek input on the proposed TIFID.
- Prepare a Resolution of Necessity (proposed new requirement under SB 239) (prepared and approved by the City Commission on March 5, 2013).
- Prepare a Comprehensive Development Plan for the District noting infrastructure deficiencies and planned activities (Exhibit B).
- Review the growth policy and zoning relevant to the proposed district to determine what has to be done to comply with 7-15-4299 MCA.
- Obtain Planning Advisory Board statement of zoning accordance and conformance of TIFID plan with the Growth Policy.

- Hold a public hearing before the governing body on the TIFID plan following notification by mail and through the placement of a legal advertisement.
- Adopt the ordinance creating the TIFID.
- Submit a certified copy of the Industrial District Ordinance containing the tax increment provision and supporting documents to the Montana Department of Revenue (7-15-4284 MCA) and all other affected taxing bodies (school districts, conservation districts, etc.) no later than February 1st of the year following the creation of the TIFID and associated base year.

Application

The CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID PLAN is a result of Great Falls City Commission's commitment to fostering the development of secondary, value adding industries, particularly light and medium-intensity manufacturing businesses in order to sustain and grow its economy over time. Great Falls City Commission intends to expand the existing approximately 100 acre Tax Increment Financing Industrial District (TIFID) to the southwest with an additional approximately 100 acres. In order to further this project, the City of Great Falls hired a TIF consultant to complete the required TIFID plan and facilitate all related needs. The proposed CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID PLAN is attached as Exhibit B. In accordance with Section 7-15-4299, MCA, a proposed TIFID plan must include the local government's planning board's recommendation that the zoning within the proposed TIFID is light or heavy industrial in accordance with the local government's growth policy. Furthermore, pursuant to Section 7-15-4213, MCA, a proposed TIFID plan must include the local government's planning board's review and recommendation as to the TIFID plan's conformity with the growth policy. To facilitate the Planning Advisory Board's review and recommendation on the accordance of the zoning within the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK with the Great Falls Growth Policy and conformance of the TIFID PLAN with the Great Falls Growth Policy, the proposed CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID PLAN has been provided to the Planning Advisory Board and is designated as Exhibit B.

Existing Conditions

Existing Use: The ±200.32 acre subject property has been annexed into the City of Great Falls and was zoned I-2 Heavy Industrial (see Exhibit C - Zoning Map). The existing portion of the District is home to the MaltEurop malting plant and the remainder of the subject property is undeveloped and has historically been used for dry-land farming.

Adjacent Land Use: Adjacent to, and west of, the subject property is U.S. Highway 87, with agricultural land further to the west. South of the subject property is additional agricultural land. North and east of the subject property is a mix of small lot subdivision and agricultural lands.

Findings

Evidence must be provided that the zoning within the proposed expansion of the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID is in accordance with the Great Falls Growth Policy and the PLAN for the proposed expansion of the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID is in conformance with the Great Falls Growth Policy. To address the statutory requirements and to help the Great Falls Planning Advisory Board make findings, the following excerpts and referenced statements are provided from the City of Great Falls Growth Policy and Title 17 of the Official Code of the City of Great Falls, which is a document used to implement the vision, goals, policies and actions presented in the plan as it relates to the Great Falls Growth Policy.

2005 City of Great Falls Growth Policy:

The Growth Policy describes the potential for “value-added” manufacturing in the following statements.

“Employment in all types of manufacturing in Cascade County grew an aggregate total of 18.7% from 1991-2001. Table 5 shows the growth in employment in various manufacturing industries during this period while Table 6 shows the growth in wages for the same industries. The approximately 80 new jobs created at the Pasta Montana plant in 1997 accounted for much of the increase in employment. In addition, Pasta Montana, the proposed new malting plants and new ethanol plant will create local markets for agricultural products where limited markets previously existed. These types of “value-added” manufacturing industries have great potential to build upon the natural resources in the area, form clean industries that provide competitive wages, and create a constant demand for the locally grown agricultural products.”

“Opportunities exist for future expansion of the manufacturing base in several areas. For example, new types of “value-added” agricultural manufacturing facilities like strawboard manufacturing, malting, or expansion of the Pasta Montana plant can increase the local manufacturing base. The Great Falls region is an excellent location for these types of manufacturing facilities. Other potential growth may come in express shipping and other industries identified in an industry targeting study recently completed by a national consultant for the Great Falls Development Authority.”

(Great Falls Growth Policy, page 6 and 7)

The Great Falls Growth Policy describes the use of tax increment financing in the following statement:

“To assist in retaining existing businesses in Great Falls and to help in attracting new economic growth to the area.... The Federal, State and local governments in the Great Falls area can provide a variety of grants, loans, incentives, and other programs to existing businesses and industries or assist new businesses become established in the community. Some of this assistance is funded by the Community Development Block Grant (CDBG) program, tax increment financing (TIF), and revolving loan funds. Local government in Cascade County plays a crucial role in economic development efforts by providing utilities, sewers, water, streets, and other types of infrastructure that is essential for new growth. In addition, the City of Great Falls works with the Chamber, GFDA, and BID on expanding existing businesses and industries and bringing new businesses to the area.”

(Great Falls Growth Policy, page 19)

The following statements describe the City of Great Fall’s Economic Development Strategic Plan.

- *A diversified base economy as the foundation for sustainable economic development.*
- *Growing the local economy through retaining and expanding existing business.*
- *Quality of life as a key factor in economic growth.*
- *Promoting and capitalizing on traditional and non-traditional community assets.*
- *Quality education at the K-12 and post-secondary levels.*
- *Military presence and the economic opportunities associated with it.*
- *Potential emergence as a center for alternative energy research and development.*
- *Collaborative approaches to economic development that define successful communities.*

(Great Falls Growth Policy, page 20)

The following Goals are intended to support future economic development in Great Falls.

- *Diversify the base economy.*
- *Enhance, strengthen, and expand the existing economic base.*
- *Attract new businesses and support expansion of existing businesses that tend to raise the median income level.*
- *Attract industries that preserve the quality of life.*
- *Encourage businesses and industries that will utilize existing infrastructure.*

(Great Falls Growth Policy, page 22)

Areas of Potential Economic Growth

The comments and recommendations from business people, residents and Neighborhood Councils call for a “sustainable” economy that strengthens the community without degrading the high quality of life in the area. The overall goal is to establish and expand those sectors of the economy that will employ people in high-paying jobs, support families, and enhance the community. In planning for economic growth, industries that can both offer high-paying jobs and enhance the quality of life in the community should be pursued. This type of industry already exists in Great Falls, and there is great potential for future expansion. The following types of businesses were specifically identified as areas with the greatest potential for growth in the base economy.

- Manufacturing
- Expansion of existing food processing facilities and new “value-added” food processors
- Establish aerospace industry
- Establish technical and engineering programs to support industry
- Agriculture
- Enhance value-added manufacturing of agricultural products
- Alternative crop/livestock production”

(Great Falls Growth Policy, page 21)

The LAND USE section describes Future Growth Areas.

“Land for continued industrial growth is generally available in the northeast corner of the urban area in and near North Park Addition and east of Source Giant Springs. Additional industrial development is also occurring near the Malt Plant currently under construction just north of the City. Vacant land south of MSU-Great Falls would be a logical and productive site for an upscale business/research park.”

(Great Falls Growth Policy, page 15)

The LAND USE GOALS section describes the goals intended to frame the major issues for the policies, actions, and strategies contained in this Element:

To support and encourage efficient, sustainable development and redevelopment throughout the community.

To preserve and enhance the character, quality, and livability of existing neighborhoods.

To support and encourage a compatible mix of land uses in newly developing areas.

To preserve, as appropriate, open space, prime agricultural lands, environmentally sensitive lands, scenic vistas, and the character and qualities of such lands.”

(Great Falls Growth Policy, page 18)

The LAND USE POLICIES section on Commercial, Office, and Industrial Uses describes the policy for locating large industrial areas.

“Commercial uses should be planned according to how they serve residential neighborhoods, the City, and the surrounding region. Further strip commercial development along major arterial roads should be avoided. The Downtown area should become a mixed-use, high-intensity activity center surrounded by viable residential neighborhoods. Large industrial areas and employment centers should be planned and located based on site requirements, ease of access by multiple types of transportation, environmental impacts, long-term relationships to residential uses, and the potential for generating related growth.”

(Great Falls Growth Policy, page 18)

Title 17: Land Development Code

This Title (Land Development Code) is established to promote the public health, safety, and welfare and is intended to accomplish the following purposes:

- *implement the goals, objectives, and policies of the growth policy*

- ensure that all development is guided by and gives consideration to the growth policy
- establish a comprehensive compendium of regulations that controls the use or development of land within the City
- provide for clear, consistent standards, regulations, and procedures for the review and approval of all proposed development within the City
- address the substantive findings as contained in this Title
- safeguard the public health, safety, and general welfare by establishing minimum standards for design and development

(17.4.050 – Purpose)

This Chapter (Land Use/Zoning) is established to promote the public health, safety, and welfare and is intended to accomplish the following purposes:

- Promote a sound development pattern by separating the City into various districts where each has uniformly applicable development standards
- Separate incompatible land uses to the greatest extent possible
- Encourage the most appropriate use of land throughout the City
- Regulate and restrict the erection, construction, reconstruction, alteration, repair, and use of buildings, structures, and land
- Provide for a wide range of housing options
- Allow different, but compatible land uses (i.e., mixed uses) to occur in specified areas of the City
- Avoid, or as a less preferred alternate, minimize congestion
- Avoid, or as a less preferred alternate, minimize environmental degradation
- Implement the City's adopted growth policy
- Prohibit any use of land within the City of Great Falls that is in violation of federal, state or local law.

(17.20.1.020 – Purpose)

“The City is divided into a number of base zoning districts so that each parcel is located in at least one (1) district and potentially more. For each of these districts, appropriate types of uses are identified along with development standards. In addition to these base districts, there are a number of overlay districts. These overlay districts are intended to accomplish specific purposes that are not generally applicable to the entire base district. Where the requirements of a base district and overlay district conflict, the most restrictive applies. The zoning map depicts the location of the base districts and overlay districts used in this chapter.”

All properties within the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID are zoned I-2 Heavy Industrial. The description of the I-2 Heavy industrial district states:

“This district is intended to accommodate those activities associated with processing raw materials or other activities with potentially significant off-site impacts. Typically, the uses found in this district are not compatible with most types of non-industrial uses.” I-2 Heavy industrial has corresponding development standards found in the Official Code of the City of Great Falls.

(17.20.2.010 - Types of zoning districts; 17.20.2.040 - Establishment and purpose of districts; 17.20 Exhibit 20-4 Development Standards)

Public Input

Public notice of the Planning Advisory Board public hearing on the expansion of the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID was published in the *Great Falls Tribune* on Sunday, February 24, 2013 and Sunday, March 3, 2013. At the time this staff report was written there was no public comment regarding this project.

Recommendations

The Planning Advisory Board has the responsibility to review and make recommendation to the City Commission on the accordance of the TIFID zoning with the Great Falls Growth Policy and the conformance of the TIFID Comprehensive Development PLAN with the Great Falls Growth Policy.

Recommendation I: I recommend the Planning Advisory Board adopt the attached PLANNING ADVISORY BOARD RESOLUTION (Exhibit A - PLANNING ADVISORY BOARD RESOLUTION) which recommends to the City Commission that the zoning, which is zoned I-2 Heavy Industrial, of the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID is in Accordance with the Great Fall Growth Policy.

Recommendation II: I recommend the Planning Advisory Board adopt the attached PLANNING ADVISORY BOARD RESOLUTION (Exhibit A - PLANNING ADVISORY BOARD RESOLUTION) which recommends to the City Commission that the CENTRAL MONTANA AGRICULTURAL & TECHNOLOGY PARK TIFID COMPREHENSIVE DEVELOPMENT PLAN is in Conformance with the Great Falls Growth Policy.

Next Steps

The Planning Advisory Board Resolution of recommendation will be provided to the City Commission.

City Commission will pass or not pass the Ordinance to establish the TIFID and adopt the Plan.

If passed, the Consultant will submit all required documents to the Montana Department of Revenue for certification of the TIFID District.

Exhibit A

RESOLUTION BY THE PLANNING ADVISORY BOARD

RECOMMENDING ACCORDANCE OF THE ZONING AND CONFORMANCE OF THE PROPOSED CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TAX INCREMENT FINANCING INDUSTRIAL DISTRICT COMPREHENSIVE DEVELOPMENT PLAN WITH THE GREAT FALLS GROWTH POLICY

WHEREAS, the City of Great Falls is interested in fostering the development, growth and retention of secondary, value-adding industries to promote economic development, to improve area employment opportunities and to expand the tax base; and

WHEREAS, the Great Falls Planning Advisory Board has been created by the City of Great Falls, as provided for in Title 76-1-101, M.C.A; and

WHEREAS, the City of Great Falls has adopted the Great Falls Growth Policy per Resolution No. 10013 on March 5, 2013, pursuant to 76-1-604, MCA; and

WHEREAS, on February 5, 2013, under Ordinance 3101, the Great Falls City Commission stated that Lot 1A, Block 1, of the International Malting Company, LLC Addition, located in Section 30, Township 21 North, Range 4 East, P.M.M., Great Falls, Cascade County, Montana, has a zoning of I-2 Heavy Industrial and the development standards shall be those prescribed in Title 17, City Code, for I-2 Heavy Industrial zoning; and

WHEREAS, the City of Great Falls has proposed establishing the **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TAX INCREMENT FINANCING INDUSTRIAL DISTRICT (CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID)**, as provided for in Parts 7-15-4201 and 4301, et Seq., Montana Code Annotated (MCA), the State's Urban Renewal Law; and

WHEREAS, pursuant to Section 7-15-4299, MCA, the planning board shall conduct a public hearing for the purpose of making a recommendation to the local governing body whether the zoning of the proposed TIFID is zoned for light or heavy industrial use in accordance with the area growth policy document; and

WHEREAS, pursuant to Section 7-15-4213, MCA, a proposed TIFID plan must include the local government's planning board's review and recommendation as to the plan's conformity with the growth policy; and

WHEREAS, the Great Falls Planning Advisory Board's review of the **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** zoning and the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID COMPREHENSIVE DEVELOPMENT PLAN (PLAN)** as it relates to the Great Falls Growth Policy has been properly submitted, reviewed, and noticed, on February 24 and March 3, 2013; and

WHEREAS, the Great Falls Planning Advisory Board held a public hearing on Tuesday, March 12, 2013, to receive and review all written and oral testimony, and staff and consultant input, on the **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** zoning and the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID PLAN** as it relates to the Great Falls Growth Policy; and

WHEREAS, _____ members of the general public spoke in regards to the **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** zoning and the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID PLAN** as it relates to the Great Falls Growth Policy, and

WHEREAS, _____ written comment(s) was received from the general public; and

WHEREAS, evidence must be provided that the zoning within the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** is in accordance with the Great Falls Growth Policy and the **PLAN** of the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** is in conformance with the Great Falls Growth Policy, and to address the statutory requirements and to help the Great Falls Planning Advisory Board make findings, the following excerpts and referenced statements are provided from the Great Falls Growth Policy and Title 17, Great Falls City Code, Chapter 20, Land Use, which is a document used to implement the vision, goals, policies and actions presented in the plan as it relates to the Great Falls Growth Policy; and

1. *The Growth Policy describes the potential for "value-added" manufacturing in the following statements.*

"Employment in all types of manufacturing in Cascade County grew an aggregate total of 18.7% from 1991-2001. Table 5 shows the growth in employment in various manufacturing industries during this period while Table 6 shows the growth in wages for

the same industries. The approximately 80 new jobs created at the Pasta Montana plant in 1997 accounted for much of the increase in employment. In addition, Pasta Montana, the proposed new malting plants and new ethanol plant will create local markets for agricultural products where limited markets previously existed. These types of “value-added” manufacturing industries have great potential to build upon the natural resources in the area, form clean industries that provide competitive wages, and create a constant demand for the locally grown agricultural products.”

“Opportunities exist for future expansion of the manufacturing base in several areas. For example, new types of “value-added” agricultural manufacturing facilities like strawboard manufacturing, malting, or expansion of the Pasta Montana plant can increase the local manufacturing base. The Great Falls region is an excellent location for these types of manufacturing facilities. Other potential growth may come in express shipping and other industries identified in an industry targeting study recently completed by a national consultant for the Great Falls Development Authority.”

(Great Falls Growth Policy, page 6 and 7)

2. *The Great Falls Growth Policy describes the use of tax increment financing in the following statement: “To assist in retaining existing businesses in Great Falls and to help in attracting new economic growth to the area.... The Federal, State and local governments in the Great Falls area can provide a variety of grants, loans, incentives, and other programs to existing businesses and industries or assist new businesses become established in the community. Some of this assistance is funded by the Community Development Block Grant (CDBG) program, tax increment financing (TIF), and revolving loan funds. Local government in Cascade County plays a crucial role in economic development efforts by providing utilities, sewers, water, streets, and other types of infrastructure that is essential for new growth. In addition, the City of Great Falls works with the Chamber, GFDA, and BID on expanding existing businesses and industries and bringing new businesses to the area.”*

(Great Falls Growth Policy, page 19)

3. *The following statements describe the City of Great Fall’s Economic Development Strategic Plan.*

- *A diversified base economy as the foundation for sustainable economic development.*
- *Growing the local economy through retaining and expanding existing business.*
- *Quality of life as a key factor in economic growth.*
- *Promoting and capitalizing on traditional and non-traditional community assets.*
- *Quality education at the K-12 and post-secondary levels.*
- *Military presence and the economic opportunities associated with it.*
- *Potential emergence as a center for alternative energy research and development.*
- *Collaborative approaches to economic development that define successful communities.*

(Great Falls Growth Policy, page 20)

4. *The following Goals are intended to support future economic development in Great Falls.*

- *Diversify the base economy.*

- Enhance, strengthen, and expand the existing economic base.
 - Attract new businesses and support expansion of existing businesses that tend to raise the median income level.
 - Attract industries that preserve the quality of life.
 - Encourage businesses and industries that will utilize existing infrastructure.
- (Great Falls Growth Policy, page 22)

5. *Areas of Potential Economic Growth*

The comments and recommendations from business people, residents and Neighborhood Councils call for a “sustainable” economy that strengthens the community without degrading the high quality of life in the area. The overall goal is to establish and expand those sectors of the economy that will employ people in high-paying jobs, support families, and enhance the community. In planning for economic growth, industries that can both offer high-paying jobs and enhance the quality of life in the community should be pursued. This type of industry already exists in Great Falls, and there is great potential for future expansion. The following types of businesses were specifically identified as areas with the greatest potential for growth in the base economy.

Manufacturing

Expansion of existing food processing facilities and new “value-added” food processors

Establish aerospace industry

Establish technical and engineering programs to support industry

Agriculture

Enhance value-added manufacturing of agricultural products

Alternative crop/livestock production

(Great Falls Growth Policy, page 21)

6. *The LAND USE section describes Future Growth Areas. Land for continued industrial growth is generally available in the northeast corner of the urban area in and near North Park Addition and east of Source Giant Springs. Additional industrial development is also occurring near the Malt Plant currently under construction just north of the City. Vacant land south of MSU-Great Falls would be a logical and productive site for an upscale business/research park.*

(Great Falls Growth Policy, page 15)

7. *The LAND USE GOALS section describes the goals intended to frame the major issues for the policies, actions, and strategies contained in this Element:*

- *To support and encourage efficient, sustainable development and redevelopment throughout the community.*
- *To preserve and enhance the character, quality, and livability of existing neighborhoods.*
- *To support and encourage a compatible mix of land uses in newly developing areas.*
- *To preserve, as appropriate, open space, prime agricultural lands, environmentally sensitive lands, scenic vistas, and the character and qualities of such lands.*

(Great Falls Growth Policy, page 18)

8. *The LAND USE POLICIES section on Commercial, Office, and Industrial Uses describes the policy for locating large industrial areas. Commercial uses should be planned according to how they serve residential neighborhoods, the City, and the surrounding region. Further strip commercial development along major arterial roads should be avoided. The Downtown area should become a mixed-use, high-intensity activity center surrounded by viable residential neighborhoods. Large industrial areas and employment centers should be planned and located based on site requirements, ease of access by multiple types of transportation, environmental impacts, long-term relationships to residential uses, and the potential for generating related growth.
(Great Falls Growth Policy, page 18)*
9. *This Title (Land Development Code) is established to promote the public health, safety, and welfare and is intended to accomplish the following purposes:*
 - *implement the goals, objectives, and policies of the growth policy*
 - *ensure that all development is guided by and gives consideration to the growth policy*
 - *establish a comprehensive compendium of regulations that controls the use or development of land within the City*
 - *provide for clear, consistent standards, regulations, and procedures for the review and approval of all proposed development within the City*
 - *address the substantive findings as contained in this Title*
 - *safeguard the public health, safety, and general welfare by establishing minimum standards for design and development**(17.4.050 – Purpose)*
10. *This Chapter (Land Use/Zoning) is established to promote the public health, safety, and welfare and is intended to accomplish the following purposes:*
 - *Promote a sound development pattern by separating the City into various districts where each has uniformly applicable development standards*
 - *Separate incompatible land uses to the greatest extent possible*
 - *Encourage the most appropriate use of land throughout the City*
 - *Regulate and restrict the erection, construction, reconstruction, alteration, repair, and use of buildings, structures, and land*
 - *Provide for a wide range of housing options*
 - *Allow different, but compatible land uses (i.e., mixed uses) to occur in specified areas of the City*
 - *Avoid, or as a less preferred alternate, minimize congestion*
 - *Avoid, or as a less preferred alternate, minimize environmental degradation*
 - *Implement the City's adopted growth policy*
 - *Prohibit any use of land within the City of Great Falls that is in violation of federal, state or local law.**(17.20.1.020 – Purpose)*
11. *The City is divided into a number of base zoning districts so that each parcel is located in at least one (1) district and potentially more. For each of these districts, appropriate types of uses are identified along with development standards. In addition to these base districts, there are a number of overlay districts. These overlay districts are intended to*

accomplish specific purposes that are not generally applicable to the entire base district. Where the requirements of a base district and overlay district conflict, the most restrictive applies. The zoning map depicts the location of the base districts and overlay districts used in this chapter.

*All properties within the **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** were zoned I-2 Heavy Industrial upon annexation. The description of the I-2 Heavy industrial district states “This district is intended to accommodate those activities associated with processing raw materials or other activities with potentially significant off-site impacts. Typically, the uses found in this district are not compatible with most types of non-industrial uses.” (17.20.2.010 - Types of zoning districts; 17.20.2.040 - Establishment and purpose of districts)*

WHEREAS, these excerpts and referenced statements demonstrate that there is a close and direct relationship between the Great Falls Growth Policy and Title 17, Great Falls City Code, Chapter 20, Land Use; and

WHEREAS, as noted in items 1, 2, 3, 4 and 5, above, the Great Falls Growth Policy deals with very broad land use issues and policies; it does not identify specific land uses or zoning changes. Additionally although zoning is one of the principal means of implementing the Great Falls Growth Policy, no specific zoning recommendations are made in the document. Instead, the Great Falls Growth Policy provides a set of general, community-wide policies and guidelines to assist the general public, local government, and developers in making informed land use decision; and

WHEREAS, it is acknowledged in items 6, 7 and 8 above and documented in the Great Falls Growth Policy that industrial development is an accepted land use on the north side of Great Falls via the description of Future Growth Areas in the LAND USE section, “additional industrial development is also occurring near the Malt Plant currently under construction just north of the City”; and

WHEREAS, the establishment of specific zoning classifications and the assignment of those zoning classifications to every parcel of land within the corporate limits of the Great Falls are performed through Title 17, Great Falls City Code, Chapter 20, Land Use. As noted in items 9, 10 and 11, above, the I-2 Heavy Industrial was established to promote public health, safety and welfare and is intended to accomplish the following purpose: to accommodate those activities associated with processing raw materials or other activities with potentially significant off-site impacts; and

WHEREAS, the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** encompasses approximately 200.32 acres; it is generally surrounded by agricultural land and is bounded by US Highway 87 on the west. This expanded district is located in Township 21 North, Range 4 East, Section 30, P.M.M., Great Falls, Cascade County, Montana. The existing portion of the District is home to Malteurop; and

WHEREAS, the Great Falls Planning Advisory Board finds that the I-2 Heavy Industrial zoning within the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID** is in accordance with the Great Falls Growth Policy; and

WHEREAS, the Great Falls Planning Advisory Board finds that the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TIFID PLAN** is in conformance with the Great Falls Growth Policy.

NOW THEREFORE, BE IT RESOLVED, that the Great Falls Planning Advisory Board, on a vote of _____, recommends to the Great Falls City Commission that the I-2 Heavy Industrial district, zoning within the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TAX INCREMENT FINANCING INDUSTRIAL DISTRICT** is in accordance with the Great Falls Growth Policy, and further recommends that the proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TAX INCREMENT FINANCING INDUSTRIAL DISTRICT COMPREHENSIVE DEVELOPMENT PLAN** is in conformance with the Great Falls Growth Policy.

DATED THIS 12th DAY OF MARCH 2013

Thor Swensson, Chairman
Great Falls Planning Advisory Board

Proposed **CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK EXPANDED TAX INCREMENT FINANCING INDUSTRIAL DISTRICT COMPREHENSIVE DEVELOPMENT PLAN**

Exhibit B Central Montana Agricultural & Technology Park Expanded Tax Increment Financing Industrial District Plan City of Great Falls, Montana

1. INTRODUCTION AND OVERVIEW

The City of Great Falls is committed to fostering the development of secondary, value adding industries, including manufacturing businesses in order to sustain and grow its economy over time. To this end, the City created the Central Montana Agricultural and Technology Park Tax Increment Financing Industrial District (TIFID) on May 17, 2005 per City Ordinance 2911. The base taxable value of the District was established as the taxable value of all real and personal property within the boundaries of the district as of January 1, 2005.

The District boundaries were expanded in December of 2007 (Ordinance 2996) in order to support potential investment in energy generation facilities. Even with this expansion, however, the current district is not large enough to support any additional industrial development and a second boundary adjustment is necessary to accommodate potential growth. This boundary adjustment would enable the City to address critical

Figure 1. Central Montana Agriculture and Technology Park

infrastructure deficiencies to recruit new value adding industry and support the growth and retention of existing manufacturing businesses.

The 2005 Great Falls Growth Policy sets forth a series of goals in support of future economic development including the following:

- Diversify the base economy.
- Enhance, strengthen, and expand the existing economic base.

Further, the Growth Policy specifically points to the need to encourage “value added” manufacturing businesses in both agriculture and non-agriculture sectors. Public investments in infrastructure in the expanded Central Montana Agriculture and Technology Park TIFID, in support of value adding industry, will include road improvements, sewer and water main extension and storm drainage improvements, enabling the City to meet these critical goals.

Tax Increment Financing will be a key component in a comprehensive funding strategy to address these infrastructure needs and will enable the City of Great Falls to leverage other local, state and federal dollars to achieve its goals.

The City of Great Falls

The population of Great Falls (2011 Census Estimate) is 58,950, showing a slight increase since the 2010 Census, when the population was 58,505 and an increase of over 3% since the 2000 census. The median income for Great Falls in 2011 adjusted dollars is \$42,105, below the state's median of \$44,392 and well below the federal median, which is \$51,484. 27,041 persons are in the Great Falls' civilian labor force including 768 in manufacturing. (American Community Survey 3-year estimate, 2009-2011) According to the Bureau of Labor Statistics, the estimated unemployment rate as of December, 2012 is 5.1%.

Great Falls is located in Cascade County, which is in north-central Montana. The County is bordered on the west by the Rocky Mountains, to the southeast by the Little Belt and Highwood Mountains. Nearly eighty years after the Lewis and Clark Expedition first explored the "great falls of the Missouri" in 1805, Paris Gibson visited the area and envisioned a prosperous community along the mighty river. Within a few years, Gibson and other early settlers designed and built an attractive, well-planned community with broad, tree-lined streets and over 800 acres of parkland. More settlers arrived in Great Falls in the 1890s to join in the growing development of mining, logging, farming, ranching, and hydroelectric power.

During the first half of the 20th century, Great Falls grew into a more diverse, urbanized community. As natural resource-based economic activity declined, it was replaced by the military, manufacturing and service sectors. Today, the qualities that first brought settlers to Great Falls continue to attract new residents, businesses and visitors to the beauty, resources, opportunities, and quality of life offered here (Great Falls Growth Policy).

History of Industrial Development in Great Falls

In its early years, industrial development in the City of Great Falls was generally located along the Missouri River and rail lines within the downtown core, in close proximity to the City's residential neighborhoods. Through the 19th and 20th centuries, as transportation and industrial technologies advanced, industrial development gradually moved towards the outlying areas of the City. These areas typically provided convenient highway and rail access, as well as separation from incompatible residential and retail land uses around the core.

The 2005 Great Falls Growth Policy indicates that approximately 1,868 acres (3.1%) of the City is used for industrial activities. The Growth Policy favors future industrial development to be in the form of industrial park or other campus like patterns, in locations with ease of access by multiple types of transportation, limited environmental impacts and the potential for generating related growth.

Central Montana Agriculture and Technology Park Expanded Tax Increment Financing Industrial District

The City of Great Falls intends to expand the Central Montana Agriculture and Technology Park Tax Increment Financing Industrial District. The base year for the purposes of measuring any incremental value in the new portion of the District will be 2013 and the base value will be calculated as of January 1, 2013.

Figure 2. Schematic of Tax Increment Financing

Tax increment financing is a mechanism that allows communities to use new tax dollars resulting from increasing taxable value for reinvestment within the geographic area in which they are derived for a period of 15 years, or up to 40 years if the incremental taxes were pledged to the repayment of a bond. (Figure 2.) Until 1989, tax increments could only be used for rehabilitation efforts within urban renewal areas, which were usually blighted central business districts.

In 1989, the Montana Legislature amended the Montana Urban Renewal Law to enable municipalities to create special industrial districts which could employ tax increment financing to assist in the development and retention of secondary, value-adding industries. In doing so, the Legislature noted that the State of Montana wishes to encourage secondary, value-adding industrial manufacturing that uses Montana timber, mineral, oil and gas, coal and agricultural resources in the production of goods in the state. The legislation recognized that secondary, value-adding industries, in order to be competitive in today's world economy, require expensive infrastructure that is beyond the means of most Montana communities. Senate Bill 472 resulted in Section 7-15-4299 Montana Code Annotated (MCA), originally codified in 1989 and amended in 2007. This law enables communities to assist in industrial development in areas that are deemed to be infrastructure deficient. Tax increment financing may now be used for improvements as defined in 7-15-4288 MCA.

In March of 2008, the Montana Department of Revenue, under its administrative rule making authority, more specifically defined “secondary industries” as those that use mechanical or chemical processes to transform materials or substances into new products in the manner defined as manufacturing in the North American Industry Classification System Manual. These industries engage in the:

- Processing of raw materials, such as minerals, ore, oil, gas, coal, agricultural products, and forestry products; or
- Processing of semi-finished products that are used by the industry as a raw material in further manufacturing.

"Value-added" is defined as an increase in the worth of the raw or semi-finished product that results from a mechanical or chemical transformation and may not be attributable to a mere increase in existing production.

In order to make use of this innovative economic development strategy, the City of Great Falls must adopt an industrial development plan that addresses both the existing and new areas of the District, which defines the specific geographic area within which the tax increment will be measured and reinvested. Further, the plan must outline those activities that the local government intends to undertake in order to successfully develop (or retain) value-adding industrial activity.

2. DISTRICT DESCRIPTION

The expanded TIFID, in its entirety, encompasses an area that is located at the northern edge of the City of Great Falls. The area is surrounded by agricultural land and is bounded by US Highway 87 on the west. The existing portion of the District is home to the Malteurop.

Figure 3. Malteurop

Legal Description

The expansion of the Central Montana District will require an amendment to the TIFID district, which will extend the boundaries of existing district to include:

Lot 1A, Block 1, of the Correctional Plat of the First Amendment to the International Malting Company, LLC Addition. This parcel is 100.00 acres in size according to official plat.

The new district boundary will be described as follows:

All of Lots 2, 4, & 5, Block 1, of the International Malting Company, LLC Addition ...and...All of Lot 1A, Block 1, of the Correctional Plat of the First Amendment to the International Malting Company, LLC Addition, totaling 200.22 acres in size.

This entire district is located in Section 30, Township 21 North, Range 4 East.

Metes and bounds description for the Revised Boundaries of Central Montana Agricultural and Technology Park Tax Increment Industrial District (TIF)

Property situated in Section 30, Township 21 North, Range 4 East, of the Principal Meridian Montana, Cascade County, Montana, described as follows:

Commencing at the East Quarter Corner of said Section 30; thence N89°28'41"W along the east-west mid-section line of said Section 30, a distance of 453.39 feet to the Northwest Corner of the First Broadway Addition to North Great Falls according to the official map on file in the records of Cascade County and Point of Beginning of the industrial tax increment district herein described: thence S00°37'48"W along the west line of said First Broadway Addition to North Great Falls, a distance of 1325.50 feet; thence N89°35'17"W, a distance of 1321.42 feet; thence S00°40'34"W, a distance of 949.63 feet; thence S89°37'42"W, a distance of 1673.41 feet; thence N00°03'09"E, a distance of 615.04 feet; thence N89°48'16"W, a distance of 850.56 feet to the southeasterly right-of-way of US Highway 87, Project Number FAP 149-F (3), according to the as-built right-of-way plans on file in the records of the Montana Department of Transportation; thence northeasterly along said right of way, N25°41'35"E, a distance of 243.87 feet; thence continuing along said right of way, N30°55'54"E, a distance of 131.85 feet; thence continuing along said right of way, N25°44'38"E, a distance of 1017.80 feet; thence continuing along said right of way, N37°01'29"E, a distance of 100.44 feet; thence continuing along said right of way, N28°18'36"E, a distance of 260.81 feet; thence continuing along said right of way, N26°35'47"E, a distance of 452.20 feet; thence continuing along said right of way along a curve with a radius of R=11,400.00 feet for a length of 852.19 feet; thence continuing along said right of way, N30°52'46"E, a distance of 599.71 feet; thence S00°43'23"W, a distance of 253.56 feet; thence S89°33'37"E, a distance of 1322.31 feet; thence S00°47'26"W, a distance of 1322.76 feet; thence S89°28'41"E, a distance of 867.34 feet to the true point of beginning.

All Parcels and Geocodes to be included in the expanded Central Montana Agriculture and Technology Park TIFID

Lot 1A, Block 1, Correctional Plat of the First Amendment to the International Malting Company, LLC Addition
County Parcel Number 1029650

Geocode: 02-3139-30-4-03-05-0000

Owner - ADF International, Inc.

Lot 2, Block 1, International Malting Company, LLC Addition

County Parcel Number 1029655

International Malting Company, LLC Addition

Geocode: 02-3139-30-4-03-09-0000

Owner - International Malting Company LLC

Lot 4, Block 1, International Malting Company, LLC Addition

County Parcel Number 1029670

Geocode: 02 3139-30-4-03-03-0000

Owner - DALI LLC

Lot 5, Block 1, International Malting Company, LLC Addition

County Parcel Number 1029675

Geocode: 02-3139-30-4-03-01-0000

Owner - DALI LLC

3. GOALS OF THE CENTRAL MONTANA AGRICULTURE AND TECHNOLOGY PARK TIFID

Considerations:

- In preparing the 2005 Great Falls Growth Policy, the staff solicited input and recommendations related to economic development from business people, residents and Neighborhood Council members. Comments received call for a “sustainable” economy that strengthens the community without degrading the high quality of life in the area. Citizens stressed that the overall economic development goal is to establish and expand those sectors of the economy that will employ people in high-paying jobs, support families, and enhance the community. They noted that, in planning for economic growth, industries that can both offer high-paying jobs and enhance the quality of life in the community should be pursued.
- Great Falls is fortunate to be home to many natural amenities and features, none more spectacular than the Missouri River corridor. Industrial development along the river has the potential to negatively impact the beauty of and access to the river currently enjoyed by the citizens of Great Falls. Therefore the City will continue to direct industrial development to specific locations on the urban fringe to protect and enhance the pristine environment along the river and the City’s residential neighborhoods.
- The City of Great Falls is surrounded by prime agricultural land capable of producing large quantities of consistently high quality grains and livestock, critical to the area’s economic base.

Based on these critical considerations, the goals of the Central Montana Agriculture and Technology Park Tax Increment Financing Industrial District are:

- To foster economic vitality in the City of Great Falls and increase employment opportunities through infrastructure development in support of secondary value-adding industry
- To provide support for industries that preserve the quality of life for all residents
- To help assure that industrial development activities reflect the City of Great Falls’ commitment to the stewardship of its agricultural and natural resources including the Missouri River Corridor and associated restoration, interpretive, recreation and conservation programs currently underway
- To encourage secondary, value adding industries that take advantage of the area’s vast agricultural resources
- To facilitate the investment in a site suitable for industrial development based on its proximity to both rail and highway transportation infrastructure.

4. INFRASTRUCTURE ANALYSIS – STATEMENT OF INFRASTRUCTURE DEFICIENCY

As noted above, the development of secondary, value-adding industries in the Central Montana Agriculture and Technology Park TIFID will require water and sewer services, transportation upgrades, stormwater collection and treatment and other improvements, depending on the types of industries that locate in the District. A review of the existing infrastructure reveals the following deficiencies:

Roads – As development occurs and traffic increases, access roadways should be paved to reduce dust and frequency of roadway maintenance. Egress routes for the heavy, wide loads should be constructed, based on carefully crafted designs that prevent roadway degradation or damage to any drainage facilities, ensure adequate turning radii, and alleviate any potential safety concerns.

Water and Sewer – There is an existing water transmission main located along the access roadway to Malteurop. There is an existing sanitary sewer trunk main and sewage lift station located on the east side of the Malteurop property adjacent to Black Eagle Road. An extension of the sewer main from this existing lift station, along the north side of the Malteurop property to the northeast corner of the proposed site for ADF, a Canadian steel fabrication company will be required.

Utilities – Telephone, cable, natural gas, fiber optic and electricity are available to the property. However, with the exception of electricity, these services will need to undergo significant upgrade to accommodate District uses. Although these utilities are present, most of the property is not served. Therefore, in addition to upsizing current utility infrastructure, extensions of these facilities may be required to serve individual needs.

Stormwater – The Public Works Department is in the process of reviewing site requirements for stormwater discharge, storage, and conveyances and on-and off-site improvements. The review will consider upstream and downstream properties and future storm drain extensions will be part of the review. As properties are developed, storm water infrastructure requirements will be more accurately determined.

General Improvements

Additional infrastructure and public services deficiencies will be identified over time. For example, emergency services buildings and equipment, site security, transloading and cargo facilities, parking lots, and other improvements and services may be required. 7-15-4288 MCA provides an extensive list of eligible items that may be paid for with tax increment dollars.

5. INDUSTRIAL DEVELOPMENT ACTIVITIES TO BE UNDERTAKEN

The City of Great Falls will work with other public entities and private developers to establish an industrial and economic development framework to enable it to target and recruit secondary, value-adding industries. Targeted industries will likely include agri-processing, as Great Falls has a significant competitive advantage over other markets. The City's location within the Golden Triangle region of north-central Montana provides access to a wide-variety of consistently high-quality wheat, barley and other small grains.

Additionally, the proximity to a variety of energy sources, rail transportation and a major highway network enhances the City's potential for general manufacturing, energy generation, steel fabrication and other value adding industries.

Identification of secondary, value-adding industries

A list of industries that could be targeted for development or expansion within the expanded Central Montana Agriculture and Technology Park TIFID is presented in Table 1, by North American Industry Classification System (NAICS) code.

NAICS Code	Industry
236210 Industrial Building Construction	This industry comprises establishments primarily responsible for the construction (including new work, additions, alterations, maintenance, and repairs) of industrial buildings (except warehouses). The construction of selected additional structures, whose production processes are similar to those for industrial buildings (e.g., incinerators, cement plants, blast furnaces, and similar non-building structures), is included in this industry. Included in this industry are industrial building general contractors, industrial building for-sale builders, industrial building design-build firms, and industrial building construction management firms.
Sector 23237 Heavy and Civil Engineering Construction	<p>The Heavy and Civil Engineering Construction subsector comprises establishments whose primary activity is the construction of entire engineering projects (e.g., highways and dams), and specialty trade contractors, whose primary activity is the production of a specific component for such projects. Specialty trade contractors in Heavy and Civil Engineering Construction generally are performing activities that are specific to heavy and civil engineering construction projects and are not normally performed on buildings. The work performed may include new work, additions, alterations, or maintenance and repairs.</p> <p>Specialty trade activities are classified in this subsector if the skills and equipment present are specific to heavy or civil engineering construction projects. For example, specialized equipment is needed to paint lines on highways. This equipment is not normally used in building applications so the activity is classified in this subsector. Traffic signal installation, while specific to highways, uses much of the same skills and equipment that are needed for electrical work in building projects and is therefore classified in Subsector 238, Specialty Trade Contractors.</p>

	<p>Construction projects involving water resources (e.g., dredging and land drainage) and projects involving open space improvement (e.g., parks and trails) are included in this subsector. Establishments whose primary activity is the subdivision of land into individual building lots usually perform various additional site-improvement activities (e.g., road building and utility line installation) and are included in this subsector.</p> <p>Establishments in this subsector are classified based on the types of structures that they construct. This classification reflects variations in the requirements of the underlying production processes.</p>
32311 Prefabricated Metal Building and Component Manufacturing	This U.S. industry comprises establishments primarily engaged in manufacturing prefabricated metal buildings, panels, and sections.
332812 Metal Coating, Engraving (except Jewelry and Silverware), and Allied Services to Manufacturers	This U.S. industry comprises establishments primarily engaged in one or more of the following: (1) enameling, lacquering, and varnishing metals and metal products; (2) hot dip galvanizing metals and metal products; (3) engraving, chasing, or etching metals and metal products (except jewelry; personal goods carried on or about the person, such as compacts and cigarette cases; precious metal products (except precious plated flatware and other plated ware); and printing plates); (4) powder coating metals and metal products; and (5) providing other metal surfacing services for the trade. Included in this industry are establishments that perform these processes on other materials, such as plastics, in addition to metals.
3112 Grain and Oilseed Milling 311224 Soybean and Other Oilseed Processing	This U.S. industry comprises establishments primarily engaged in crushing oilseeds and tree nuts, such as soybeans, cottonseeds, linseeds, peanuts, and sunflower seeds. Examples of products produced in these establishments are oilseed oils, cakes, meals, and protein isolates and concentrates.
325193 Ethyl Alcohol Manufacturing	This U.S. industry comprises establishments primarily engaged in manufacturing nonpotable ethyl alcohol.
221117 Biomass Electric Power Generation	This U.S. industry comprises establishments primarily engaged in operating biomass electric power generation facilities. These facilities use biomass (e.g., wood, waste, alcohol fuels) to produce electric energy. The electric energy produced in these establishments is provided to electric power transmission systems or to electric power distribution systems.
221112 Fossil Fuel Electric Power Generation	This U.S. industry comprises establishments primarily engaged in operating fossil fuel powered electric power generation facilities. These facilities use fossil fuels, such as coal, oil, or gas, in internal combustion or combustion turbine conventional steam process to produce electric energy. The electric energy produced in these establishments is provided to electric power transmission systems or to electric power distribution systems.

Further research and analysis will be required to determine which of these industries can be actively recruited based on market conditions and the Central Montana Agriculture and Technology Park's site's unique position in the market place. Issues such as energy costs related to operations and transportation, distance from markets and overall industry trends, as well as infrastructure requirements will help determine industries to be targeted.

Capital Improvements Planning and Implementation

The City of Great Falls will undertake the necessary planning required to more particularly identify the infrastructure required to support the development of targeted secondary, value-adding industries. This planning effort will address necessary capital improvements and the associated costs. Infrastructure design and development could include roads and other transportation infrastructure such as rail lines, pedestrian ways, sewage pre-treatment, sewer lines, water wells and mains, utilities, street lighting, communication infrastructure such as cell towers and additional fiber cable and buildings.

TIFID Program Criteria

The City of Great Falls will use tax increment financing in conjunction with other funding mechanisms to support the development of secondary value-adding industry within the Central Montana Agriculture and Technology Park. Infrastructure projects selected for funding will be required to meet certain criteria, based on the goals of this TIFID Plan. Suggested eligibility criteria for reviewing both city-initiated and industry-initiated requests for public infrastructure improvements projects might include the following:

1. The project must be located within the authorized TIFID area.
2. Any developer who wishes to apply for tax increment assistance for the construction of public infrastructure will be asked to enter into an assessment agreement with the local government. An assessment agreement is a document which obligates the developer to pay all property tax obligations for the period during which the tax increment is being used to assist the developer, but no longer than the authorized life of the tax increment provision of the TIFID in which the development is located. This obligation remains in effect, even in the event that the developer closes or moves its facilities. Further, depending on the nature of the assistance, the developer may have to agree to continue to pay taxes at least at the property tax rate which was in effect at the time the agreement is executed, regardless of changes in the tax rate by the State of Montana.

3. Specific criteria which will be used to evaluate applications for assistance will include but are not limited to:
 - a. Job Creation – Developments will be evaluated based upon the number of direct jobs created. Advantage will be given to developments where the wages and benefits for the jobs meet or exceed the current average Great Falls Per Capita Personal Income.
 - b. Taxable Valuation – In most cases, developers who contribute more to the community’s tax base will be eligible for greater assistance.
 - c. Value-adding – Developers must be engaged in “secondary industries”, defined as those industries that use mechanical or chemical processes to transform materials or substances into new products in the manner defined as manufacturing in the North American Industry Classification System Manual. Those developers who make use of Montana’s mineral, agricultural, energy and timber resources will receive preferential treatment compared to those who do not.
 - d. Leverage-Ratios – Tax increment funds may not be used to finance the entire cost of development. Those investments of tax increment financing which result in a larger infusion of private or other public capital will receive preferential treatment compared to those that result in smaller infusion of private or other public capital.

Each project will be analyzed individually to determine the amount of financial assistance available based upon the factors stated above. Final criteria will be approved by the Great Falls City Commission and employed by the staff in reviewing project proposals.

Financing

Once targeted industries and required capital improvements have been more clearly identified, the next step will be to develop the mechanisms to implement the overall TIFID program. Given that private industrial development will generate the property taxes necessary to finance a portion of the infrastructure development, recruitment and infrastructure development must occur hand in hand. It is possible that construction of public infrastructure will be financed through the sale of Tax Increment Bonds in combination with other state and federal funding programs. Tax increment financing mechanisms can include:

- Tax Increment Bonds – Tax increment revenues would be pledged to pay bond principal and interest annually. The size and term of the bond would depend on tax increment revenues available from private sector taxpayers within the TIFID. While Montana law provides that tax increment districts may only be authorized for 15 years, the time period may be extended to coincide with the term of a tax increment bond, but no longer than an additional 25 years. As noted above, it may be necessary for the private taxpayer(s) to enter into an agreement with the City of Great Falls to assure, for the term of the bond, the annual payment of all property taxes due or an equivalent amount if the taxpayer no longer holds property in the district. The amount of tax increment realized each year must be enough to cover all bond payments due, as well as an adequate reserve.
- Annual Tax Increment Appropriations – The City may finance smaller public infrastructure improvements from its annual tax increment receipts by appropriation. Funds available each year would be determined by the size of the annual increment and any prior commitments (such as bond debt service requirements and administrative costs).
- Tax Increment Financing Revolving Loans – The Montana TIF statutes provide for the establishment of loan programs, whereby TIF funds may be loaned for the construction of private infrastructure or other activities in support of the goals of the TIF district. As principal and interest payments are made, the funds may be loaned again, even after the TIF District sunsets.
- Conventional Financing – The City may borrow funds from commercial lending institutions in order to finance public infrastructure improvements. Annual tax increment revenues will pay principal and interest on the loan. A conventional loan agreement will not, however, extend the authorized 15 year time period for a TIFID.

Per 7-15-4291 MCA, The City of Great Falls may enter into agreements with the other affected taxing bodies to remit to such taxing bodies any portion of the annual tax increment not currently required for the payment of the costs listed in 7-15-4288 MCA or pledged to the payment of the principal of premiums, if any, and interest on bonds.

Industry Recruitment

Once the District is established, local staff and resources and/or consultant services could be used to assist in the development of business plans, market studies and general research to recruit secondary, value-adding industries to the TIFID. Once the District starts generating revenue, TIFID funds may be directed to these activities as well.

Partnership Development

The TIFID program will rely on cooperative efforts among the City of Great Falls, TIFID property owners, and economic development organizations to achieve its goal of fostering industrial development. In many cases, these cooperative partners will work jointly on market analyses, business recruitment and capital improvements planning. Also, as noted above, it will be necessary to work with other local, state and federal entities in providing additional financing and matching funds to build industrial infrastructure in the TIFID. Potential partnerships can be forged using a variety of programs and funding mechanisms. A sampling of these includes:

Programs

- The Treasure State Endowment Program (Montana)
- Community Development Block Grant (U.S. Department of Urban Development)
- The Montana Intercap Program
- Economic Development Administration (U.S. Department of Commerce)
- *Water, Wastewater and Solid Waste Action Coordinating Team* (a group of professionals from state, federal, and non-profit organizations that finance, regulate, or provide technical assistance for community water and wastewater systems)
- Community Transportation Enhancement Program – Under 23 USC 133 (d) (2) (Federal Code), 10 percent of the Surface Transportation Program monies are awarded to each state for transportation enhancements.

Funding Mechanisms

- Local mill levies for transportation infrastructure (7-14-4101 MCA)
- Transportation Improvement Authority (7-14-1001, MCA)
- Special Improvement Districts (7-12-4101 MCA)
- Debt Financing – Counties can make use of various kinds of debt financing to fund industrial development projects. These include general obligation bonds, special improvement district bonds and revenue bonds as well as Tax Increment Financing Bonds.
- State Fuel Tax (15-70-101MCA)

6. PROGRAM ADMINISTRATION

In the near term, the Central Montana Agriculture and Technology Park TIFID will be managed directly by the City of Great Falls. No later than April of each year the City Commission, in conjunction with staff, will prepare an annual TIFID budget and work plan for the following fiscal year (July 1st to June 30th). Each annual work plan will include the following elements:

- Anticipated Increment Revenue for the Year
- Project Priorities and Associated Costs
- Financing Strategies Anticipated
 - Direct Increment Revenue
 - Debt Financing
 - Other Sources of Funding
- Administrative Budget including staff and consulting services

The City Commissioners will review the work plan and determine whether any changes are necessary before setting the budget. Once the budget is set, City staff will be responsible for:

- Developing financing strategies
- Working to maintain the Tax Increment Financing Accounts
- Working with City staff, property owners and developers to identify public infrastructure projects for the future
- Reviewing proposed infrastructure development projects for the future
- Following all local government procurement rules with respect to:
 - Preparing bid and proposal requests
 - Reviewing proposals from engineers, contractors and other vendors
 - Making recommendations to the City Commission regarding contractor selection
- Monitoring projects
- Conducting market analyses, engineering studies and project feasibility analyses

The City Commission may consider the formation of a TIFID Advisory Board to work with the Commission in preparing annual budget and work plans, and in TIFID related economic development activities. The Advisory Board would be comprised of five to seven members, including one member of the City Commission. Meeting schedules, agendas and board governance would be jointly decided by the members and the Commission, and in accordance with Montana’s open meeting laws. Each member of the Advisory Board would serve for two years and may be reappointed. The first appointees to the Advisory Board would be appointed in the following manner, to provide for staggered terms:

- Two to three members for one year
- Two members for two years
- One to two member for three years

Following this initial appointment schedule, all Board members would be appointed for a term of two years.

7. PLAN AMENDMENTS

The plan provides flexibility to accommodate a variety of approaches. However, changes over time may necessitate more formal amendments to the Industrial District Plan. If required, amendments will be made by ordinance.
